CLAW SKC EVO+

GENERAL

Art.Nr:	CL-003	Standards:	EN 353-1:2014+A1:2017
GTIN:	4030281310303	Net weight:	0.00 kg
E-class number:	40-02-01-90	Gross weight:	0.00 kg
Customs tariff number:	84799070		

DATASHEET

CLAW SKC EVO+

The SKC EVO+ device is designed to meet the unique safety needs of those working with the CLAW LINE vertical lifelines. Crafted from a combination of light alloy and stainless steel, this fall arrest device is engineered to ensure longevity and durability in demanding work environments. Its small size and lightweight construction make it easy to handle and transport, without compromising on safety. One of the standout features of this device is its innovative double-action opening system that can be operated with just one hand. This system ensures that the device opens only when the required actions are performed sequentially, reducing the risk of accidental opening.

Additionally, SKC EVO+ boasts an innovative patented anti-overturning function. The integrated energy absorber helps dissipate and reduce the impact forces during a fall, minimizing the risk of injury to the operator. The device is also engineered to effortlessly pass intermediate supports without requiring manual intervention, saving valuable time and effort during work at height. Furthermore, our device accommodates a wide range of user profiles. It can be actually used by people weighing between 50 kg (excluding equipment) and 140 kg (including equipment). SKC EVO+ is certified according to EN 353-1:2014+A1:2017 standard.

- designed to easily pass intermediate supports without manual intervention

- patented anti-overturning function

FEATURES

Application areas:	Roofers, Flat roof construction, High Rack storage
Colour:	Orange, Silver
Maximum lifetime:	10 years
Maximum number of persons:	1
Maximum temperature:	80 °C
Minimum temperature:	-20 °C
Rope access technique:	No
Vertical systems:	Vertical rope system

DIMENSIONS

Rope length:	0.00 m
Minimum height:	0 mm

MATERIAL

Material:	Stainless Steel
