DATASHEET

VIPER STEEL SC

The VIPER STEEL SC is a robust steel carabiner with a screwgate that has been specially developed for use in rope access technology as well as in rescue and special operations. The screw lock provides additional safety and prevents unintentional opening of the gate. With a high breaking load of 50 kN and a maximum gate opening of 27 mm, it offers reliable performance even under demanding conditions. Thanks to the keylock closure, the carabiner is easy to handle without snagging rope or equipment. Its durable steel construction enables a maximum service life of up to 30 years, making it a reliable choice for firefighters, rescue workers and professional users.
