E-class number:	40-02-01-90	Gross weight:	2.08 kg
Customs tariff number:	73269098		

DATASHEET

CLAW LINE AP STEEL LADDER

The CLAW LINE AP STEEL LADDER for ropes larger than 9 mm is suitable for the system variant "ladder attachment", in which the arrester system can be attached directly to the ladder used (steel, aluminium). The stainless steel anchor point, with its high force absorption capacity via two rungs, ensures that the force applied in an emergency is fully borne by the system. CLAW LINE AP STEEL LADDER can be used for all types of rungs and rung spacing. The upper or lower ladder anchor point can be combined with other lower CLAW LINE anchor variants directly on the structure or other anchor points. The alligator clip can be used with all rung types.
The CLAW LINE vertical steel rope fall arrester system combines the highest level of climbing safety and maximum attachment flexibility.

FEATURES

Colour:	Silver
Maximum number of persons:	3
Maximum load:	150.00 kg
Rope access technique:	No
Vertical systems:	Vertical rope system

DIMENSIONS

Max height:	420 mm
Minimum height:	420 mm

MATERIAL

Material:	Stainless Steel
