DATASHEET

# CLAW LINE TOP AP ALU

The CLAW LINE TOP ANCHOR POINT for the "ladder attachment" system variant, in which the arrester system can be attached directly to the aluminium ladder used. The stainless steel anchor point ensures that the force applied in an emergency is fully borne by the system thanks to its high force absorption capacity with the aid of a spar and rung reinforcement over 3 rungs. The upper ladder anchorage point can be combined with other lower CLAW LINE anchorage variants directly on the structure or other anchorage points.
The CLAW LINE vertical steel rope fall arrester system combines the highest level of climbing safety and maximum attachment flexibility.

## FEATURES

| | |
|---|---|
| Colour: | Silver |
| Maximum number of persons: | 3 |
| Maximum load: | 150.00 kg |
| Rope access technique: | No |
| Vertical systems: | Vertical rope system |

## DIMENSIONS

| | |
|---|---|
| Max height: | 710 mm |
| Minimum height: | 720 mm |

## MATERIAL

| | |
|---|---|
| Material: | Stainless Steel |
