DATASHEET

PEANUT Y

The compact connecting device PEANUT Y with the FS64 AL OR karabiner convinces with its self-retracting arms, which do not restrict the working radius and ensure that the drop height is extremely low. The FS64 AL OR GR with an opening width of 64 mm is light and yet very robust with a reinforced gate. The lanyard is perfectly suited for continuous, mutual securing - even at lower heights. The PEANUT Y is edge-suitable and thus also serves for horizontal securing. The product contains the One-4-All damper and is therefore suitable for a very wide range of user weights from 50 to 135 kilograms. Due to the 2.5 m long arms, the PEANUT Y is ideal for securing in scaffolding. The fastener is available in a variety of karabiner variants (aluminium, steel, etc.). A red indicator shows when the strap has been released and provides additional safety.
