DATASHEET

IGNITE ARGON

IGNITE NEON's little brother is suitable for activities done while sitting where no chest ascender is needed on the harness. The built-in attachment points have the IGNITE series color concept: Bright orange for the attachment points, in compliance with EN 361, grays for the positioning and sitting attachment points. There are also two integrated gray loops for attaching a seat board. The high-quality, padded waist harness can be easily adjusted, as can the flexible leg connections, which have high wearing comfort because of the dual adjustment options. Once adjusted, you can depend on it to hold the desired length, even while working. Breathable and removable padding as well as the stitched belt straps in the shoulder area prevent heavy sweating or cutting into your neck. The smallest size has two gear loops, the others have four. - Comfortable harness for rope access applications - High-quality padding - Optimized adjustment options
