DATASHEET

ACX BACK-UP-SET

The SKYLOTEC ACX Back-up Set is a compact belay set designed for BACK UP belaying when transporting personnel with the ACTSAFE ACX. It was developed for professional users who need a coordinated additional belay solution when using the battery-powered rope ascender.

The set combines a 15-23 QD SLING with EASY SPEED, LINK 20, and two OBX TG connectors. This creates a compact SKYLOTEC system add-on for applications where personnel are transported using the ACTSAFE ACX and a suitable BACK UP safety system is required.

Weighing just 0.56 kg, the ACX Back-up Set remains lightweight and easy to handle. The functionally coordinated components support a well-organized system configuration and simplify the provision of the necessary safety elements in professional use.

Your benefits at a glance

- BACK UP belay system for ACTSAFE ACX

According to the product information, the ACX Back-up Set is intended for BACK UP belaying when transporting people with the ACTSAFE ACX. It is therefore specifically tailored to this application.

- Coordinated System Add-on

The included components are bundled as a set and support the creation of a suitable safety solution when using the ACTSAFE ACX.

- With EASY SPEED as the Central Safety Component

EASY SPEED is part of the set and serves as a central component of the BACK UP safety system. This adds an important

element to the set for use with the ACTSAFE ACX.

- Connecting elements included in the package

With LINK 20 and two OBX TG units, the set includes the necessary connecting elements for system setup. This means that key components of the safety solution are included directly in the set.

- Compact and lightweight

With a net and gross weight of 0.56 kg each, the ACX Back-up Set is particularly easy to handle. This simplifies transport, setup, and use in everyday professional work.

- Clear SKYLOTEC solution for specific ACX applications

The set is specifically designed for personnel transport with ACTSAFE ACX and offers users a compact, coordinated addition for relevant operational situations.

Components of the set

- 15-23 QD SLING

The 15-23 QD SLING is included in the set as a sling component and is part of the system configuration for BACK UP belaying.

- EASY SPEED

EASY SPEED is the central safety component of the ACX Back-up Set and is used for the BACK UP safety system when transporting personnel with ACTSAFE ACX.

- LINK 20

LINK 20 is included in the set as a connecting element and completes the
