GTIN:	4030281168294	Gross weight:	11.32 kg
E-class number:	40-21-90-90		
Customs tariff number:	84798997		

DATASHEET

SEAL PAC

The SKYLOTEC SEAL PAC is a professional storage and packaging solution for rescue equipment. It was developed to significantly simplify the annual inspection of rescue equipment kept on standby for emergencies while also ensuring protected storage.
The system consists of a low-air, sealed aluminum package housed in a sturdy aluminum box. Visual moisture monitoring allows the condition of the packaging to be easily checked without the need for time-consuming transport or extended downtime.
The annual inspection can be performed by authorized inspectors directly on-site. The moisture indicator is checked, and the system is then resealed.
The resealing process enables a service life of up to 30 years. Thus, the SEAL PAC offers a well-designed SKYLOTEC system solution for companies that want to keep rescue equipment ready for emergencies—long-term, securely, and in a way that facilitates inspection.

Your Benefits at a Glance

• Simplified Annual Inspection
With the SEAL PAC, the annual inspection of rescue equipment can be organized more easily. Authorized inspectors can perform the inspection directly on-site, reducing transportation distances and downtime.

• Visual moisture check
The condition of the packaging can be checked via a visual moisture inspection. This saves time during maintenance and supports clear, traceable monitoring of equipment stored and ready for use.

FEATURES

Colour:	Various
Maximum lifetime:	15 years

DIMENSIONS

Rope length:	250.00 m

MATERIAL

Material:	Various

DATASHEET

SEAL PAC

• Low-air, sealed packaging
The low-air, sealed aluminum packaging protects the rescue equipment during storage. This makes the SEAL PAC particularly suitable for equipment kept on standby for emergencies and requiring regular inspection.

• Sturdy aluminum box for secure storage
The aluminum box offers a stable and practical storage solution. It ensures protected storage and facilitates the deployment of the rescue device during operations.

• Up to 30-year service life thanks to re-sealing
The re-sealing process enables a service life of up to 30 years. This makes the SEAL PAC a long-term, predictable solution for professional users and operators.

• Versions for 80, 120, 150, and 250 m rope lengths
Versions are available for different rope lengths, allowing you to select the appropriate SEAL PAC based on your application.
Components of the set

• Low-air, sealed aluminum packaging
The sealed aluminum packaging ensures protected storage of the rescue device and facilitates visual moisture inspection as part of the annual inspection.

• Aluminum box
The sturdy aluminum box protects the packaged equipment during storage and facilitates organized deployment during operations.

DATASHEET

SEAL PAC

• Moisture monitoring
Visual moisture monitoring allows for easy inspection of the packaging's condition and facilitates inspection-friendly storage of rescue equipment.

• Sealing for inspection documentation
After inspection, the SEAL PAC can be resealed. This ensures the inspection status remains traceable and the equipment is prepared for further storage.
Frequently Asked Questions

What is the SEAL PAC used for?
The SEAL PAC is used for the protected, inspection-friendly storage of rescue equipment kept on hand for emergencies.

How does the SEAL PAC facilitate the annual inspection?
The annual inspection can be performed by authorized inspectors directly on-site. The visual moisture check reduces effort, transportation distances, and downtime.

What type of packaging is used for the SEAL PAC?
The rescue equipment is stored in a low-oxygen, sealed aluminum package inside an aluminum box.

What is the expected service life?
According to the product information, the resealing process enables a service life of up to 30 years.

For which rope lengths is the SEAL PAC available?
In addition to 80 m, the product page lists variants for 120 m, 150 m, and 250 m.

Who is the SEAL PAC intended for?
The SEAL PAC is suitable for operators and
