JACKPOD TRI 1

GENERAL

Art.Nr:	JP-011-1	Standards:	CEN/TS 16415:2013, EN 795:2012/B
GTIN:	4030281203520	Net weight:	16.84 kg
E-class number:	40-02-01-09	Gross weight:	16.84 kg
Customs tariff number:	84289090		

DATASHEET

JACKPOD TRI 1

With the new tripod systems, flexible fall protection for working in tight spaces is now a breeze. These portable, step-by-step height-adjustable systems require only a small working footprint and, thanks to their low weight and compact size, are easy to transport and store. High-quality aluminum and galvanized steel ensure excellent resistance to aging. The JACKPOD TRI, available in two versions, covers vertical access applications with a variable height adjustment ranging from 1.2 to an impressive 2.26 meters. Even very wide entry openings can be accommodated. When using a rope winch, such as the JACKPOD WINCH 1, the fall arrest function for one person is already provided, and even descent into deeper work environments no longer poses a risk.

Using the JACKPOD TRI 1 safely in confined spaces: In our Confined Spaces Training <https://www.skylotec.com/eu_en/trainings/confined-spaces/>, you'll learn the correct setup and safe use of the system during entry and exit, as well as in rescue situations.

FEATURES

Colour:	Red
Anchor point type:	Mobile anchor point
Maximum lifetime:	10 years

MATERIAL

Material:	Aluminium, Steel
