GENERAL

Art.Nr:	SET-400-20	Net weight:	5.92 kg
GTIN:	4030281308348	Gross weight:	5.92 kg
E-class number:	40-21-90-90		
Customs tariff number:	84798997		

DATASHEET

ROOFWORXX KIT

The SKYLOTEC roofworxx Kit is a professional roof safety and rescue kit for working at elevated workstations on construction sites or on roofs. It was developed for applications where reliable fall protection at edge areas and a rescue option in case of emergency are required.
The kit combines the SKN BFD SK12 with the compact SIRIUS descender, LOOP 26 kN webbing slings, OVALSTEEL TRI carabiners, a ROPE GUARD, cable ties, a metal plate for a nameplate, and aDRYBAG for transport and storage.
Thanks to its edge compatibility, the traveling fall arrest device is particularly well-suited for horizontal work on edge-of-fall areas. In an emergency, the compact and high-performance SIRIUS descender can be used for rescue operations. The roofworxx kit thus offers a well-designed SKYLOTEC system solution for construction and roofing work, where safety, rapid deployment, and coordinated components are crucial.

Your Benefits at a Glance

• Roof Safety and Rescue Kit for High-Altitude Work Sites
The roofworxx Kit provides a complete set of fall protection equipment for work at elevated locations on construction sites or roofs. This provides users with a practical system solution for professional roofing and construction work.

• Suitable for horizontal work along edges
Thanks to its edge-compatibility, the traveling fall arrest device is suitable for horizontal work along fall edges. The kit thus supports safe operations in

ROOFWORXX KIT

typical work areas on roofs and construction sites.

• Includes the SIRIUS descender for rescue operations
The compact and high-performance SIRIUS descender is included in the set and can be used for rescue operations in an emergency. As a result, the roofworxx kit combines fall protection and rescue capabilities in a single system.

• Available in multiple rope lengths
The set is available with rope lengths of 10 m, 20 m, and 30 m. This allows you to select the appropriate version depending on the work area and operating height.

• Coordinated connecting elements included in the set
Tri-Lock carabiners and webbing slings complete the system and support the safe setup of the equipment during use. The components are designed for professional use when working at fall-off edges.

• Convenient storage in the DRYBAG
The included DRYBAG is used for organized storage and easy transport of the set's components. This keeps the equipment protected, compact, and ready for quick use.
Set Components

• SKN BFD SK12
The SKN BFD SK12 is the central fall arrest component in the set. It is designed as a traveling fall arrest device for horizontal work at edges where a fall could occur.

DATASHEET

ROOFWORXX KIT

• 2 LOOP 26 kN
The two LOOP 26 kN webbing slings complement the system as anchorage and connection elements and support the safe setup of the equipment.

• 2 OVALSTEEL TRI
The two OVALSTEEL TRI carabiners serve as robust connecting elements within the set. The Tri-Lock safety mechanism ensures safe use in professional applications.

• SIRIUS
The compact SIRIUS descender is part of the set and can be used for rescue in an emergency.

• DRYBAG
The DRYBAG is designed for protected storage and easy transport of the set's components. This keeps the equipment organized and readily available.

• ROPE GUARD
The ROPE GUARD is included in the set and complements the equipment for use when working near fall-off edges.
Using the roofworxx Kit Safely: In the appropriate training courses, you will learn the correct use of the includedSystem <https://www.skylotec.com/eu_en/trainings/competent-person-systems/>and PPE <https://www.skylotec.com/eu_en/trainings/pe-application/>components, as well as how to use them safely when working in areas with a risk of falling.

Frequently Asked Questions

For what types of work is the roofworxx kit suitable?

DATASHEET

ROOFWORXX KIT

The roofworxx kit is suitable for work at elevated workstations on construction sites or on roofs, particularly for applications near fall-off edges.

Is the kit suitable for horizontal work along fall edges?
Yes. According to the product information, the traveling fall arrest device is suitable for horizontal work along fall edges thanks to its edge compatibility.

Which rescue component is included?
The kit includes the compact SIRIUS descender, which can be used for rescue in an emergency.

What rope lengths are available?
The roofworxx kit is available in rope lengths of 10 m, 20 m, and 30 m.

What components are included in the roofworxx kit?
The kit includes the SKN BFD SK12, two LOOP 26 kN, two OVALSTEEL TRI, SIRIUS, DRYBAG, and ROPE GUARD.

What is the intended application for the kit?
The kit is intended for use on roofs.

What is the maximum service life of the roofworxx kit?
The maximum service life is 10 years. The actual service life depends on usage, maintenance, storage, and regular inspection.

Can the roofworxx kit be used in the SEAL PAC?
No. The product page specifies that the roofworxx kit cannot be used in the SEAL PAC.

How much does the roofworxx kit weigh?
The net and gross weights for the version with a 10-meter rope are both listed as 4.62 kg.
