Customs tariff number:	84251900		

DATASHEET

ENDURANCE PAC

The SKYLOTEC ENDURANCE PAC is a rugged storage box for MILAN rescue devices.
It was developed for operators and professional users who keep rescue devices on hand for emergencies over the long term and want to organize the mandatory annual inspection in a way that is as simple, time-saving, and inspection-friendly as possible.
The ENDURANCE PAC allows for a purely visual inspection of the moisture indicator, which is visible from the outside. This indicator shows whether the box is airtight and whether the contents remain in their original, undamaged condition. According to the product information, this inspection can be performed by anyone and does not need to be carried out by a trained expert.
The storage box is airtight, UV-resistant, and resistant to water, solvents, corrosion, fungal growth, and impact damage. It also withstands temperature and weather fluctuations. With a specified service life of 30 years, the ENDURANCE PAC reduces the time, logistics, and training required for stockpiling MILAN rescue equipment. Self-luminous stickers on the box facilitate easy use in an emergency. SKYLOTEC thus offers a well-designed system solution for rescue equipment stored for long-term operational readiness.

Your benefits at a glance

- Robust storage box for MILAN rescue devices
The ENDURANCE PAC was developed specifically for storing MILAN rescue devices.
This makes it ideal for organizations that need to keep rescue equipment safe, organized, and ready for emergencies over the long term.

FEATURES

Colour:	Various
Maximum lifetime:	30 years

DATASHEET

ENDURANCE PAC

• Visual inspection saves time and effort
The moisture indicator, visible from the outside, allows for easy visual inspection. This makes it possible to verify whether the box is airtight and whether the contents are still stored in their original, undamaged condition.

• No inspection by a qualified expert required
According to the product information, the visual inspection can be performed by anyone and does not need to be carried out by a trained expert. This reduces the organizational effort involved in the annual inspection.

• 30-year service life
The ENDURANCE PAC is specified to have a service life of 30 years. This provides a long-term, predictable solution for operators who must maintain rescue equipment on a permanent basis.

• Airtight and weather-resistant
The box remains airtight throughout its entire service life and withstands temperature and weather fluctuations. This ensures protected storage of the rescue device under demanding conditions.

• Resistant to many external influences
According to the product information, the ENDURANCE PAC is resistant to UV radiation, water, solvents, corrosion, fungal growth, and impact damage. This makes it suitable for long-term storage in professional operational environments.

• Self-luminous stickers for emergencies

DATASHEET

ENDURANCE PAC

Individual stickers on the box are self-luminous. This facilitates easy use in an emergency and makes it easier to locate the provided rescue equipment.
Components of the Set

• Rugged storage box
The storage box is designed for long-term storage of MILAN rescue equipment.
It is airtight, UV-resistant, and designed for a 30-year service life.

• Moisture indicator
The moisture indicator, visible from the outside, allows for a visual check of the box's airtightness. It indicates whether the contents remain in their original, undamaged condition.

• Self-Luminous Stickers
Individual stickers on the box are self-luminous, facilitating easy use in an emergency.

• Internal MILAN rescue device
The ENDURANCE PAC is designed to store MILAN rescue devices. The specific configuration of the internal rescue device is not listed separately as a list of components on the product page.
Frequently Asked Questions

What is the ENDURANCE PAC used for?
The ENDURANCE PAC is used for the long-term storage and protected safekeeping of MILAN rescue devices.

What is the main advantage of the ENDURANCE PAC?
The main advantage is the simplified annual inspection, which involves a purely visual check of the moisture indicator visible from the outside.

Does the annual inspection have to be

DATASHEET

ENDURANCE PAC

performed by a qualified professional?
No. According to the product information, the visual inspection can be performed by anyone and does not have to be carried out by a trained professional.

What is the specified service life?
The maximum service life is 30 years.

Is the ENDURANCE PAC airtight?
Yes. According to the product information, the ENDURANCE PAC is completely airtight throughout its entire service life.

What environmental factors is the ENDURANCE PAC resistant to?
The product page lists resistance to UV radiation, water, solvents, corrosion, fungal growth, and impact damage.

Can the ENDURANCE PAC withstand weather fluctuations?
Yes. According to the product information, the ENDURANCE PAC can withstand temperature and weather fluctuations.

What applications are listed?
Various applications are listed on the product page.

How much does the ENDURANCE PAC weigh?
Both the net and gross weights are listed as 12.43 kg.
